Trudy
Dear Bob,

If you think this is bogel stationary, well, I wrote all of WHITEWASH on suca.

When you were here, I think with Paul, we discussed the kind of misinformation some of the left was publishing on how to make bombs and other suca devices, amounting to an easy way to commit suicide. I now have need for all the examples with which you can supply me, as rapidly as possible, and, where you know it, what happened. I would like to be able to make facsimile reproduction. Anything at all on the subject: bad trips on bombings.

I might also be able to work in that unreported surrounding of the Pittsburgh ghetto so please include that, a separate item. All the detail possible, including the asellings in court.

There is no time for explanations now. I am about to leave for DC and didn't have time to write last night. We had company from before I got the word on a project "Bomb Baby Bomb", for which I want this. It is under consideration by a publisher and I'd have to do it fast, while the hearings are going on. It would say there never has been any interest in bombings until the traditional victims become the bombers. and that violence (against the blacks) is more American than cherry pie.

If you can get the papers in the Skolnick suit subsequent to the filing, I'd like them. I could get them from the clerk if I could pay for them. There have been papers filed by the government, including an affidavit, which I need not only to have a record on Skolnick, whose last move was to get the case delayed on the ground all the judges were biased, but also in connection with my own suits, four more of which are close to being filed, the reason for the trip to DC today.

No word yet from the publisher who is supposed to be editing SCUP down. Edited copy was due a week ago today. And the contract hasn't arrived.

I did a guy a favor a week ago, and he gave me something I'm going to sell, but I expect some of your new friends would have loved to have had such a gift: a brand new Remington Gamemaster Model 760 automatic rifle(pump), .35. Except for the calibre, this is the rifle used to kill King. This thing costs about \$150, and I need that much more than a souvenir.

Best regards,
